

Sora-Fix

Vehicle Type List

The vehicle type list is continuously expanded. The latest version can be found under: <http://www.avova-childcare.com>

5111002 22/11

Made in Germany

Sora-Fix is approved as a child seat for a child with statures of 100-150 cm, approximately from 3 to 12 years old. It can be installed forward-facing on vehicle seats approved to UNECE Regulation No.16 or equivalent standards, attached to the vehicle's ISOFIX Anchoring Points. It is compatible with universal seating positions in vehicles. For suitable positions in a vehicle, please refer to your vehicle handbook.

This vehicle fitting list contains vehicle models that are approved by AVOVA to be used with Sora-Fix. It is updated and expanded continuously. You can download the latest version at our website: www.avova-childcare.com

Because of the variations of vehicle models, ISOFIX Anchoring Points might be missing in some vehicle models even listed in this list, in some regions. Please actually check that your vehicle contains ISOFIX Anchoring Points for installation.

⚠ DANGER ALWAYS secure your child with the vehicle's 3-point belt.

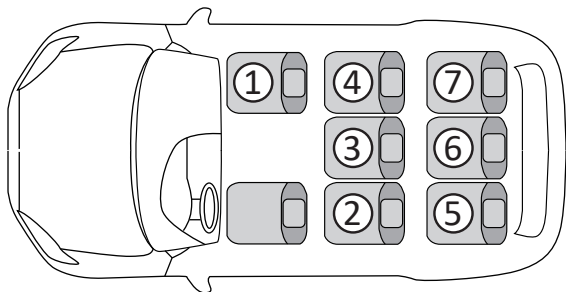

⚠ DANGER Check if there is an airbag for the vehicle seat intended to be installed with Sora-Fix, because an airbag protects an adult but is dangerous for a child.

- Front row seat with airbag in the panel: slide the front row seat a long way back.
- Second or third row seat with airbag in the vehicle seat ahead: slide the corresponding front row seat a long way forward.
- Always check your vehicle handbook for instructions.

⚠ WARNING In some vehicle models, the room in the vehicle would not allow the headrest of the child seat to be adjusted to its highest position, and the range of the child seat might be limited to 100cm – 135cm instead of 100cm – 150cm.

⚠ CAUTION Check the road traffic regulations in the country where you are travelling. The use of your child seat may be restricted.

Position of vehicle seat:
