Installation

Connection cable

- throughput
- ground
- +12V reverse signal
- video-signal

Camera not suitable for permanent operation!

Note: If the camera is powered by reverse signal we recommend to install a relay between power supply of reverse signal and power supply of the camera to ensure a stable and uninterrupted power supply and avoid unwanted errors in the board computer.

Camera-configuration

(Cut cable loops if required)

With guide lines

Without guide lines

Do not cut!!!

Tip for dealers: Inform your end customers that the rear-view camera mustn't be cleaned by steam cleaner!
